- MRI

## PERTH RADIOLOGICAL CLINIC

# Barium Meal

## A Guide for Patients

An appointment has been made for you

At: .....

Time: .....

Date: .....

Please bring all your previous medical imaging studies with you.  
If you cannot keep your appointment please let us know well in advance.

# Barium Meal

**Your doctor has requested a Barium Meal.**

## What is a Barium Meal?

A Barium Meal is an examination of the upper part of the gastrointestinal tract (G.I.T), i.e. oesophagus, stomach and duodenum.

## How long will the procedure take?

The examination usually takes between 10 - 15 minutes.

## Preparation

**You must not eat or drink anything after midnight the night before the examination.**

## Procedure

You may be given granules which, when swallowed, will release some gas in your stomach. It is important to try to keep the gas in the stomach for the duration of the test. A cup of flavoured barium is then swallowed and you will be asked to roll into different positions on the x-ray table, to mix the barium and gas in your stomach and duodenum.

A small injection may also be given to help relax your stomach. This may cause temporary blurring of vision. You should not drive a car until your vision has returned to normal.

The barium will be viewed on the x-ray machine while you are moved into different positions to allow the barium to reach all parts of the stomach. The Radiologist will take a series of x-rays.

While being x-rayed it is important to follow directions and hold your breath when asked, to ensure the x-rays are not blurred.

## After the procedure

After the barium meal you will be given a mild laxative to take home with you to overcome the constipating effect of the barium. You should drink plenty of fluids. Your bowel actions may be white for some days following the procedure.

**If you are diabetic or have any other medical condition which requires a special diet and drugs, please inform us before your appointment.**

**If you have any questions regarding the procedure please contact us or speak to your doctor.**

**If you have any questions please don't hesitate to ask us!**

## The Perth Radiological Clinic Difference

- 15 convenient locations
- Caring, helpful and professional staff
- State-of-the-art diagnostic equipment
- Over 40 specialist radiologists trained to provide you with accurate and reliable reports
- World class digital image networking between clinics provides the benefit of second opinions from specialist radiologists no matter which of our clinics you attend.
