PERTH RADIOLOGICAL CLINIC

Intubated Small Bowel Study

A Guide for Patients

An appointment has been made for you

At:

Time:

Date:

Please bring all your previous medical imaging studies with you.
 If you cannot keep your appointment please let us know well in advance.

Intubated Small Bowel Study

Your doctor has requested a specialised x-ray examination of the small intestine - Small Bowel Study. This leaflet explains what is involved.

Before the X-ray

It is important that your bowel is clean so that the Radiologist may have a clear view. When the x-ray is booked our staff will explain the dietary requirements.

The Doctor (Radiologist) will introduce the barium into the bowel through a small tube. This is inserted into the nose after a spray of local anaesthetic to minimise discomfort. The tube is then guided to the correct position by the Radiologist. The barium is run through the tube into the bowel and x-ray images are taken as it outlines the intestine.

After the X-ray

Barium passes quickly through the large bowel. Drinking plenty of fluids will help to remove it. You will be given a mild laxative to take home with you to overcome the constipating effect of the barium.

Instructions

Before the small bowel x-ray, your diet is restricted to enable the bowel to be cleared of residue, otherwise the examination may not be completely satisfactory. Please call in to our Clinic to make an appointment and collect your preparation.

Preparation:

Day before examination:

Evening Meal:

A light evening meal before 7pm.

AT 8pm:

Mix the contents of the PICOLAX sachet with 120mls of water. Drink all of this mixture followed by two (2) large glasses of clear fluids.

Have nothing to eat after drinking the laxative.

Clear fluids may be taken throughout the evening to satisfy thirst.

From midnight nothing to eat, sips of water for thirst.

Appointment Time: Date:

If you have any questions please don't hesitate to ask us!

The Perth Radiological Clinic Difference

- 15 convenient locations
- Caring, helpful and professional staff
- State-of-the-art diagnostic equipment
- Over 40 specialist radiologists trained to provide you with accurate and reliable reports
- World class digital image networking between clinics provides the benefit of second opinions from specialist radiologists no matter which of our clinics you attend.
